

Smarter Projects. Safer Sites. Stronger Results

Project Management with Proven Results.

Skyway's experienced Project Management teams manage even the most complex projects from start to finish – **delivering results with full accountability and ongoing support.**

Our proprietary platform, Skytrax, integrates innovative technology to streamline planning, design, resource management, time capture, tracking, and reporting – all in real time.

With dashboards and full transparency, Skytrax empowers clients with visibility and control over performance at every stage.

Digitization

Skytrax replaces outdated manual forms with a fully digital workflow:

- Scaffold requests
- Estimates & Cost Approvals Time Sheets
- LEMS & Lem Approvals

THE RESULT? Faster processing, greater accuracy, and more time in the field
~ boosting safety, efficiency, and cost-effectiveness.

Key Features of Skytrax

- Real-Time Visibility ~ *Get instant updates on project performance.*
- Dashboards ~ *Visualized metrics tailored to your project's goals.*
- Comprehensive KPIs ~ *Track cost, schedule, productivity, safety, and more.*
- Web-Based Access ~ *Use it on desktop, tablet, or mobile— wherever you are.*
- SOC 2 Type 2 certified ~ *Ensuring the highest standards in security compliance.*

Built for the End-User

Skytrax was designed with usability at its core – **whether you're in the field logging time or in the office reviewing performance dashboards, the experience is seamless and intuitive.**

- Historical Path Planning - Leverage historical project data to drive efficiency and continuous improvement.
- 4D collaborative environments - Reuse proven models to accelerate planning and reduce work.
- Labor Cost History - Improve forecasting accuracy with real-world cost data.
- Rental vs. Purchase Insights - Support asset decisions with historical usage and cost trends.
